

WE NEED YOUR HELP

Our son was born on 25 January 2008 in Akademickie Centrum Kliniczne [the Medical Academy Clinical Centre] (known as Szpital Kliniczny [Clinical Hospital]) in Gdańsk. Already during the pregnancy doctors discovered that the baby had had a severe cardiac defect – HLHS. The diagnosis sounded like a verdict. The lack of the left ventricle of the heart. A surgery proved necessary immediately after birth.

We jumped to action. Thanks to our efforts, the help from our family and friends, as well as the people of good will who were moved by our tragedy, on the eleventh day after he was born Oliwier left for Child's Cardiosurgery Clinic in Munich for his chance for a life.

An immediate, extremely complicated open heart surgery was performed by an accomplished paediatric cardiac surgeon, prof. Edward Malec, and his excellent team. The child is alive, but it is only the beginning of the fight for his life.

Little Oliwier will have the chance for a normal life only if he undergoes two equally complicated and expensive open heart surgeries in Munich. They cost about 54,000.00 Euro. What is more, the transport in a specially adapted airplane and in an ambulance for transporting babies with cardiac defects with necessary services of a medical doctor together with the equipment (life-saving during the transportation) adds up another 50,000.00 PLN. We have to gather the money for all the three operations. These amounts exceed our financial capacity.

This is why we turn to all the people of good will and compassionate hearts for financial support in saving our son. We believe that with your help Oliwier will enjoy life like other children of his age.

We want to thank beforehand for the help in the fight for the life of our son.

Oliwier's parents,

Iza & Jacek Hinz

We ask you with all our heart for a financial support...

Every penny has a great importance!!!

PLEASE DIRECT FINANCIAL HELP
